

Westfield London Shopping Centre.

Ideas at work.

Essential services for business, delivered with energy.

Global shopping centre group Westfield were investing £1.2bn in a 5-year development in London.* When asked to replace another contractor at short notice, we hit the ground running and delivered – on schedule, on budget, and with zero safety incidents.

As big as 30 football pitches, the Westfield shopping centre in the White City area of London took 5 years and an 8,000-strong workforce to complete. Utilities were fundamental to finishing the whole project on-time. With 15km of cabling – including a fibre network to allow remote control of the entire power system – we delivered 11kV across 24 sub-stations. We also provided a local gas network. And all in just 12 short months. From a standing start. Put simply, our teams are total professionals. We don't mess about, and we don't mess our customers about either.

* Westfield London Shopping Centre is London's largest shopping destination.

We have the design and engineering track record to deliver large projects. But it's attention to detail and absolute concern for safety that counts.

SSE Enterprise is no ordinary contractor. For a start, we're part of one of the UK's leading, longest-established energy companies. (The one that's also the UK's biggest 'living wage' employer.)

As a major contractor, we're proud to have made a difference to some of the UK's most prestigious developments: bringing energy and up-to-the-minute ideas to every project.

Safety first, always

For the Westfield Group, we're proud to provide a host of essential services:

- HV infrastructure
- Fibre network
- LV cabling
- Gas network
- Civil works
- Safety, legal and compliance

But what we're most proud of is our safety record. Our teams have been

awarded over 30 RoSPA Awards. As we've shown on a project like Westfield – with no safety incidents across 12 months – we do everything safely, or not at all.

Smart by design

For customers, our rigorous approach to risk management pays dividends. It builds smart working practices, and reduces lost time.

Equally, on a large, intensive project, you need a team with the resources, skills and flexibility to dovetail with other key contractors.

As part of SSE, we have over 50 years' experience in building power grids, large and small. So, you can be sure that the underlying design has the backing of a major UK energy company.

Working in partnership with your project team, we aim to give you total confidence in end-to-end delivery.
