

The SSE Arena, Wembley.

Ideas at work.

Essential services for business, delivered with energy.

The Beatles, Bowie and Beyoncé have all played here. Lately, our engineers have been performing at London's most iconic music venue too. In a major refurbishment, we've been working around the clock, while working around the crowded performance schedule.

Situated next to Wembley Stadium, this is an unusual building.* It was originally a swimming pool, designed by an engineer rather than an architect. And it shows. Constructed in reinforced concrete, it had the world's widest concrete arches at the time. Today, the venue's appeal is even broader – hosting shows from CBeebies to Queen to The X Factor. However, when the building required an intensive upgrade in 2014, it was essential that 'the show must go on'. That's why the venue needed a mechanical and electrical contractor with the full range of resources and expertise. Our end-to-end skills allow us to integrate works into an effective plan with built-in flexible working practices. In brief, we are always ready to rock.

* Developed for the 1934 British Empire Games, it was used as an aquatics centre for the 1948 Olympics.

We have the design and engineering track record to deliver large scale projects. But it's attention to detail and absolute concern for safety that counts.

SSE Enterprise is no ordinary contractor. For a start, we're part of one of the UK's leading, longest-established energy companies. (The one that's also the UK's biggest 'living wage' employer.)

As a major mechanical and electrical contractor, we have the resources – from design to delivery – to help some of the UK's most famous venues shine.

Flexible working

Our end-to-end skill set means we can also deliver the complete contract, saving time and hassle.

At The SSE Arena, we're proud to provide a surprising range of services such as:

- General building works
- Refurbishment of flooring
- Fire safe doors
- Decor, paintworks, branded decals

The scale of our operation, and range of expertise, gives you greater flexibility.

If you have a project where you need total confidence in your contractors, talk to SSE Enterprise today.

 **0345 070 2019**  **enquiries@sseenterprise.co.uk**

We can handle almost any gig – from powering up the most energy intensive operations to changing a plug. But, our flexible working practices also mean we can work around your business needs.

For example, when The X Factor Final arrived in the middle of this project, our teams 'downed tools' and left a completely clean site – only resuming work when the show's run had ended.

What matters most, of course, is safety. With over 30 awards from RosPA, your project is, literally, safe in our hands.

Experience and innovation

We have the specialist experience to deal with older buildings too – whether that's outmoded electrics or, worse still, the presence of asbestos on site.

We can also bring new technology to bear – from energy-saving LED lighting to sophisticated building automation.
